

Document & Workflow Automation for Auto Dealerships

IPFLO

Lower dealership costs, improve responsiveness by taking control of document-driven processes

As manufacturer requirements, regulatory mandates and price pressures increase, auto dealers find it more difficult to maintain profitability and high service levels. Upland's FileBound helps dealers get control of paper documents and manual processes that increase costs and prevent maximum efficiency.

Auto dealerships across the country use FileBound to digitize deal jackets, repair orders, parts tickets, accounts payable invoices, human resources (HR) documents and more and then automate processes associated with them. These dealerships are able to increase efficiency, improve responsiveness to customers and manufacturers and hold the line on costs by eliminating manual paper-based processes. For authorized users, documents are immediately available from any location, or even a mobile device, while being protected from unauthorized viewing, loss or unforeseen disasters.

Benefits

- Eases compliance with manufacturers' audits and other compliance requirements to provide documents and/or audit trails proving all protocols were followed
- Automates processes such as approvals or requests by routing them electronically
- · Increases efficiency and productivity to support growth without increasing staff
- Eliminates the space and time spent storing and retrieving paper documents
- Meets customer demand for less-hassle sales processes by providing immediate access to recent credit applications, documentation of the terms of a previous purchase or other information that can streamline the customer experience
- Role-based user rights make it easy to provide access to the information users need while protecting sensitive documents such as customer credit applications and employee HR files, even across multiple rooftops
- Integrates with most dealer management systems (DMSs), but allows dealerships to control how documents are automatically classified and stored without being tied to a DMS that no longer meets the company's needs

"FileBound has been an easy decision and a win-win. The car business has become complicated enough. At least this is one thing that makes it easier."

 George Huffman, dealer Pearl Motor Company

"The product is clean and intuitive. After we bought FileBound, three of us went in for training and left less than an hour later — it was so simple."

Keith Dey, IT Manager

"Previously finding the right file was a frustrating, time consuming process. FileBound has made this process simpler and cut our search time by more than half."

Michael Sivadon, Senior Analyst

Easy-to-Use Search and Retrieval

Regardless of whether they began as paper, email, a PDF report or virtually any other format, once documents are in the FileBound system, employees can find the information they need in seconds using the terms that are already part of the business process.
